VENEERED BOARDS
REALwood

Popolnoma avtentično.

Entirely authentic.

Zaznamovane z nenavadnostjo narave, prerojene v edinstveni obliki. Razpoke in grče niso napake, ampak znaki pristnosti. Naši lesni materiali so mojstrovine furnirske umetnosti – vsak kos je unikaten.

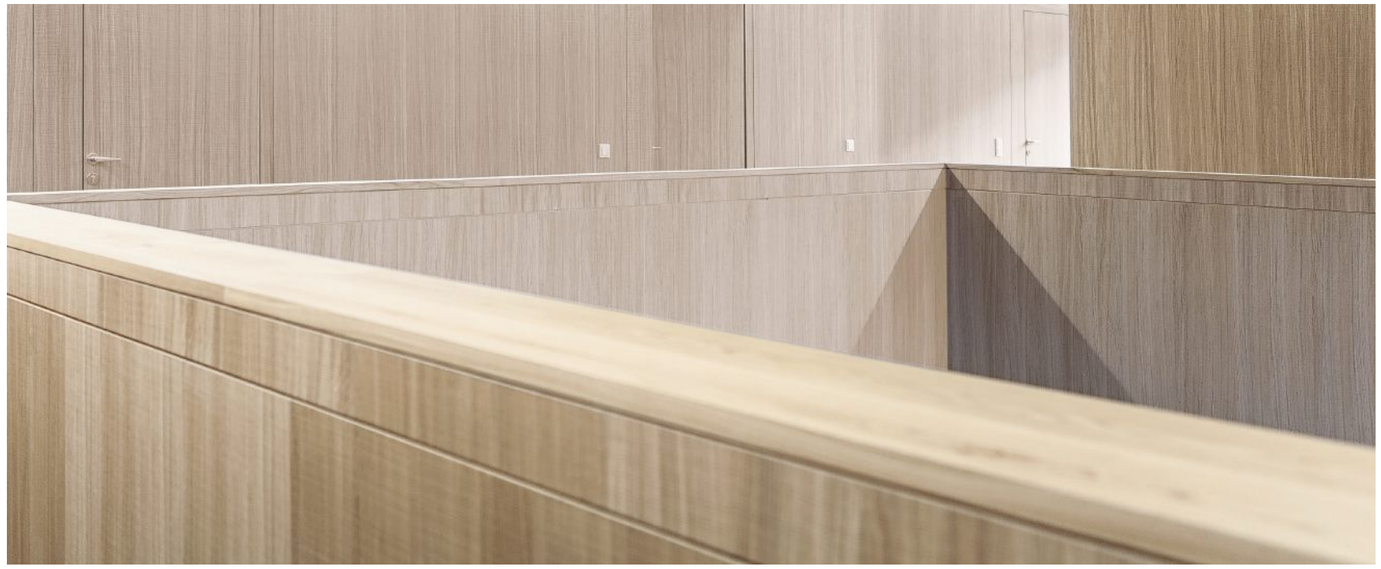

Naravno vzgojene lesene strukture pričajo o lepoti nepopolnosti. Vse pripravljeno za dom v osrčju narave – skupaj z jasnim sporočilom o trajnosti.

Marked by the whims of nature, only to be reborn in a unique form. Cracks and knots are not flaws, but signs of authenticity. Our wood materials are masterpieces of veneer art - each piece is unique.

The naturally grown wood structures bear witness to the beauty of imperfection. Everything ready for a home in the heart of nature - together with a clear message of sustainability.

Večdimenzionalnost

Površine je mogoče dojeti tako figurativno kot dobesedno. Ščetkanje odstrani mehke dele lesa, trda področja površine pa ostajajo takšna kot so. Strukture, obroči, grče in kodri tvorijo tridimenzionalno pokrajino - hribovja in doline. Brušeni furnirji so ugled pravega lesa. Rezultati se med posameznimi vrstami lesa razlikujejo. Nekateri so subtilni, drugi bolj očitni. Kljub temu pa so vsi zelo kakovostni. Stopite v stik s svojo prodajno ekipo iz Kaindla.

Multidimensionality

Surfaces one can grasp both figuratively and literally. Brushing removes the soft parts of the wood. The hard areas remain as they are. Structures, rings, knots and curls form a three-dimensional landscape. Hilly and valleys. Brushed veneers are the epitome of real wood. The results differ from one wood type to the next. Some are subtle, others more obvious. But they are all of a high quality. Get in contact with your Kaindl sales team.

Grobi Rez | *Rough Cut*

Razmišljati izven okvirjev.

Groba struktura lesa postane na oplemenitih površinah vidna in otipljiva. Idealno za personalizirano obdelavo (po meri) in idealno, da pustite osebno noto. Brusne mrežice, gobice in krtače puščajo sledi, ki okrepijo strukturo in poudarijo značaj lesa.

Thinking outside the box.

The wood's naked structure is visible and palpable on the refined surfaces. Ideal for customised processing. Ideal for making one's mark. Abrasive webs, sponges and brushes leave traces, strengthen the structure and emphasise the character of the wood.

IDEJA | *IDEA* BLACKBACK

Izgled | *Look*

Črni premaz tvori optično popolno ozadje na odprtih mestih. Ne more se zgoditi preboj črnega lepila! Rahlo bleščanje črnih pik skozi prozorno lepilo izgine s površinsko obdelavo (lak, olje itd.). Kaindl Blackback je primeren za vse rustikalne vrste lesa (furnirja) razen za starinski hrast in antični hrast.

The black primer forms the optically perfect background at the open spots. A black glue punch can not happen! The slight glimmering of the black spots through the transparent glue disappears with the surface treatment (varnish, oil, etc.). Kaindl Blackback is suitable for all rustic types of wood.

Velikost | *Size*

2800 x 2070 x 8/18 mm (MDF - Osnovna plošča | *MDF - Substrate*)

Uporaba | *Application*

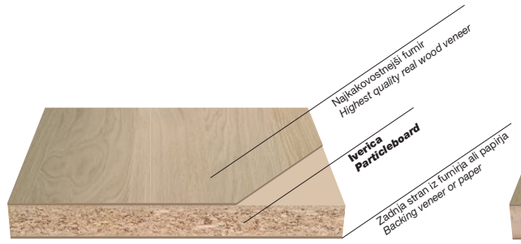

Blackback je primeren za vse vrste lesa z odprtimi karakteristikami (grče, razpoke ...), razen za staran hrastov furnir in antični hrastov furnir. Zlasti pri debelini furnirja 0,6 mm. Blackback je edini način, da se izognemo vizualno motečemu preboju lepila

Blackback is suitable for all types of wood with open characteristics. Especially with veneer thicknesses of 0.6 mm Blackback is the only way to avoid visually annoying glue punch.
